Dear Rock

X1 Reference: Contract [redacted] PAR 242
"Color Demonstration Material"

In order to complete our briefing materials for PAR-213, we will require more material than was listed in PAR 242. Our letter of 5 May 1965 indicated that considerably more slide material would be needed than was included in PAR 242; we would therefore like to expand PAR 242 to include additional materials as indicated below. This would require a new schedule and fiscal estimate. It is assumed that all slides discussed in PAR 242 are made by color separation printing.

Additional Materials

1. Increase item 3f of PAR 242 to five each.

2. Add: one contact SO-121 on SO-121 by subtractive printing.

3. Add: one contact SO-121 to 4400 by white light printing thence to 8430 by mercury light printing.

4. Add: one contact from original 4404 to 8430 and one SO-121 on SO-108 (additive).

5. Add: one each 1X, 2X and 4X from 5X Interneg Ektacolor -- all by subtractive printing.

In summary, this means that the number of slides for the revised PAR will be increased from seven to 18 each, four of which will be by subtractive printing, and one will be from black and white to black and white.

Boyd

Declass Review by NGA.
